

Calculating toll costs

A basis for calculating offers

This is where map&guide will support you

Calculating reliable offers

Truck toll charges are a major part of the costs involved in a transport route. So it is important to know the exact charges when calculating offers.

Calculating special toll

map&guide also takes special tunnel charges and bridge tolls in numerous European countries into account.

Avoiding toll routes

If necessary the plan will avoid toll routes. A comparison will quickly show if a detour is worthwhile or too time-consuming.

Current toll tables

The live update will let you know when new toll tables can be downloaded.

Toll kilometre supplement for exact toll calculation

Sometimes, toll increases are announced in a particular country, but the official toll calculation tables are not immediately released for the software. In this situation, you can define a custom charge per toll kilometre for each country and vehicle type. The software uses this charge to calculate toll costs so your results remain highly accurate until the official tables are released.

European overview: Exact toll values

The map will show you at a glance where map&guide has exact toll values available.

Use map&guide to calculate the toll costs for your trips and for each vehicle. The calculation is based on the official toll tables for numerous European countries.

Land	Anmerkungen	Mautstrecke	Maut	Sondermaut	Gesamtmautkosten
Italien		285,70 km	42,78 €	0,00 €	42,78 €
Österreich	2), 3)	369,88 km	107,94 €	49,63 €	157,57 €
Deutschland		150,50 km	23,31 €	0,00 €	23,31 €
Tschechien	9)	41,90 km	5,01 €	0,00 €	5,01 €
Sondermautstrecken:					
Land	Beschreibung	Kosten			
Österreich	A13 Brennerautobahn	49,63 €
